## UltraCLAVE IV new release

Dear Milestone Friend,

We are pleased to announce you the release of the new UltraCLAVE IV on the market.

The ULTRACLAVE IV represents an enhancement of its predecessor, in terms of ease of use and overall performance.

The ULTRACLAVE IV introduces **four major improvements**:

- New display integrated in the unit, which offers the possibility of visualizing real-time information about working temperature, pressure, and time. Moreover, it enables opening and closing of the vessels and pressure release.
- New compact user interface. The ULTRACLAVE IV uses the rugged terminal 1640 with a easy-to-use new operating software.
- New microwave wave-guide. The microwave wave-guide has been completely re-designed to further improve the microwave distribution in the vessel and to facilitate maintenance and service.
- New high-purity tantalum thermowell that offers a superior chemical resistance to the acids attack and enable a perfect temperature control.

Milestone is the microwave leader in providing laboratories safe, productive, and flexible options for Digestion, Extraction, Synthesis, Scale-up, Mercury determination, and Ashing.
