

## **SPEX CertiPrep Ltd. is Looking for New Distributors!**

Beginning in January 2010, SPEX CertiPrep Inc. will manage all Middle Eastern and African sales relations from our European Headquarters based in London, United Kingdom.

We are currently looking to expand our distribution network in these regions and would be pleased to meet any interested companies at our Stand, number 349, at the upcoming Arablab exhibition.

Our products can be classified into two sections, sample preparation equipment and certified reference materials. All of our products are manufactured in the USA and Canada, but shipment and sales relations will be handled from the United Kingdom where we maintain a considerable stock that is available for immediate shipment.

The sample preparation equipment includes Mills, Grinders, Presses, and Fusion Equipment for use in a variety of fields including XRF, Biotechnology and Forensics. The certified reference materials are used to calibrate and check samples on analytical instruments such as AA, ICP, ICP-MS, IC, GC, GC-MS, and HPLC.

We look forward to meeting any interested parties at our stand in January!
